

Print this at 100% first, or the numbers will be wrong.

In the print dialog choose **100%** or **Actual size**. Do **not** pick “Fit to page” or “Shrink to fit”. Then lay any **credit or debit card** on the dashed outline. If the card matches the outline exactly, the ruler below is accurate. If it doesn't, print again.

Lay a bank card here

It should match this outline edge to edge

How to measure

1. **Cut a thin strip of paper** (or use a piece of thin tape).
2. **Wrap it across the widest part of your nail**, from one side edge to the other, following the curve. Don't pull it flat.
3. **Mark the strip** with a pen where each edge of your nail meets it.
4. **Lay the strip flat on the ruler** below and read the width in **millimetres** between your two marks.
5. **Do all ten fingers**. Left and right hands are rarely the same.

Between two numbers? Round up. A slightly big nail files down to a perfect fit. A nail that is too small won't stay on.

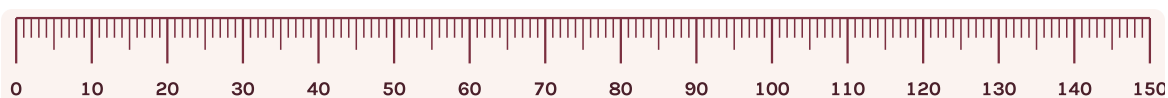

Write them here

	THUMB	INDEX	MIDDLE	RING	PINKY
Left hand	mm	mm	mm	mm	mm
Right hand	mm	mm	mm	mm	mm

Typical widths: pinky 7-10 · ring 10-13 · middle 11-14 · index 10-13 · thumb 14-18 mm. Yours may sit outside these — trust your measurement.

Then enter all ten at **pressedbyhales.com** when you order. Your set is made to these numbers.

Ruler — millimetres, accurate only when printed at 100%

Lay your paper strip along the top edge with your first mark on 0.
